SUMMARY

Computer Science student at CSULB with professional experience in security deployment, remote education, and safety leadership. Passionate about data privacy and mitigating LLM sycophancy, I work well in roles that value clear communication, curiosity, and high-integrity engineering.

EDUCATION

California State University, Long Beach (CSULB) **AUG 2024 – PRESENT**

B.S. in Computer Science

Relevant Coursework: Principles of Programming Languages; Probability and Statistics; Software Development and Management; and Algorithms

EXPERIENCE

LMNTRIX | Tustin, CA **JUNE 2023 – AUG 2023**

Cybersecurity Analyst Intern

- Imaged, tested, and deployed 12 Linux security appliances for commercial use, enabling the company to serve professional business clients with the LMNTRIX suit of security features in stable and industry-ready machines.
- Set up SSH and Linux and Windows virtual machines on industry-grade servers using Macbooks to gain familiarity with industry-standard technologies and the professional cybersecurity practices of LMNTRIX.
- Observed high-level negotiations between LMNTRIX officials and potential clients to learn more about the business-to-business level of commercial enterprise and its primary differences with consumer-facing business.

Neuracode | Online **JUNE 2023 – AUG 2023**

Intro to Machine Learning Tutor

- Taught middle school students about the basic concepts and applications of machine-learning to give them an z
- Led a group of 4-5 students for 8 weeks in correspondence with a team of tutors and coordinators to ensure a smooth and comprehensive class experience through online meetings and discussions.

Coding Minds | Irvine, CA **APRIL 2025 – PRESENT**

Coding Instructor

- Led small groups of K-12 students in multi-week programs on CS, ML, and coding subjects to kickstart their educational journey with lessons, projects, and interactive activities.

ASI CSULB | Long Beach, CA **MAY 2025 – PRESENT**

Rockwall Attendant & Trip Leader

- Follow strict safety protocols for belaying students on a 30-foot rock wall and for leading students on outdoor adventures to help build safe and fun experiences for students.
- Enforce strict safety protocols for climbers while also engaging with them and helping to increase attendance rates by fostering a growing bouldering community.

AI Research Club | Long Beach, CA **AUG 2025 – PRESENT**

Secretary

- Manage club Notion, meeting minutes, and officer communications to support club operations of over 8 officers.
- Work with other club officers to plan a medium-sized data-science hackathon for next year to give over 50 students an opportunity to engage their skills, learn about data science, and network.

TECHNICAL SKILLS

Programming: Python, Java, C++, F#, SQLite, HTML, CSS, JavaScript
Platforms: Windows, Linux, Github, Git, Google Collab

PROJECTS

BEACH HACKS 2025 **MAR 2025**

Participant

- Led a team of 4 to create a financial advisor chatbot utilizing FLASK, HTML, CSS, and JS.
